Fuel Pump Driver Modules

Fuel Pump Driver Modules control the voltage to the Fuel Pump in order to maintain proper fuel pressure over the full operating range of the engine.

- ✓ **Powder coated** to prevent corrosion
- ✓ **Includes rubber mounting bushings** to position away from the steel mounting surface and to provide additional vibration damping
- ✓ **Improved micro-processor** that provides greater response time and reliability by protecting the fuel pump and the module itself from opens and shorts

Original Aluminum Housing

Extremely failure prone due to corrosion.

The original aluminum housing corrodes because it is un-protected. The module is mounted against a steel frame causing accelerated corrosion from frequent exposure to moisture.
