

new generation

QUARTZ INEO ECS is a new generation oil with exceptional ecological and economical performances.

The result of our partnership with PSA Peugeot Citroën,

it is the ideal Fuel Economy lubricant for all Diesel engines, enabling maximum optimisation of the diesel particulate filter.

Giving ultra-high cylinder protection, it prolongs your engine life, while improving comfort and driving pleasure.

1 liter

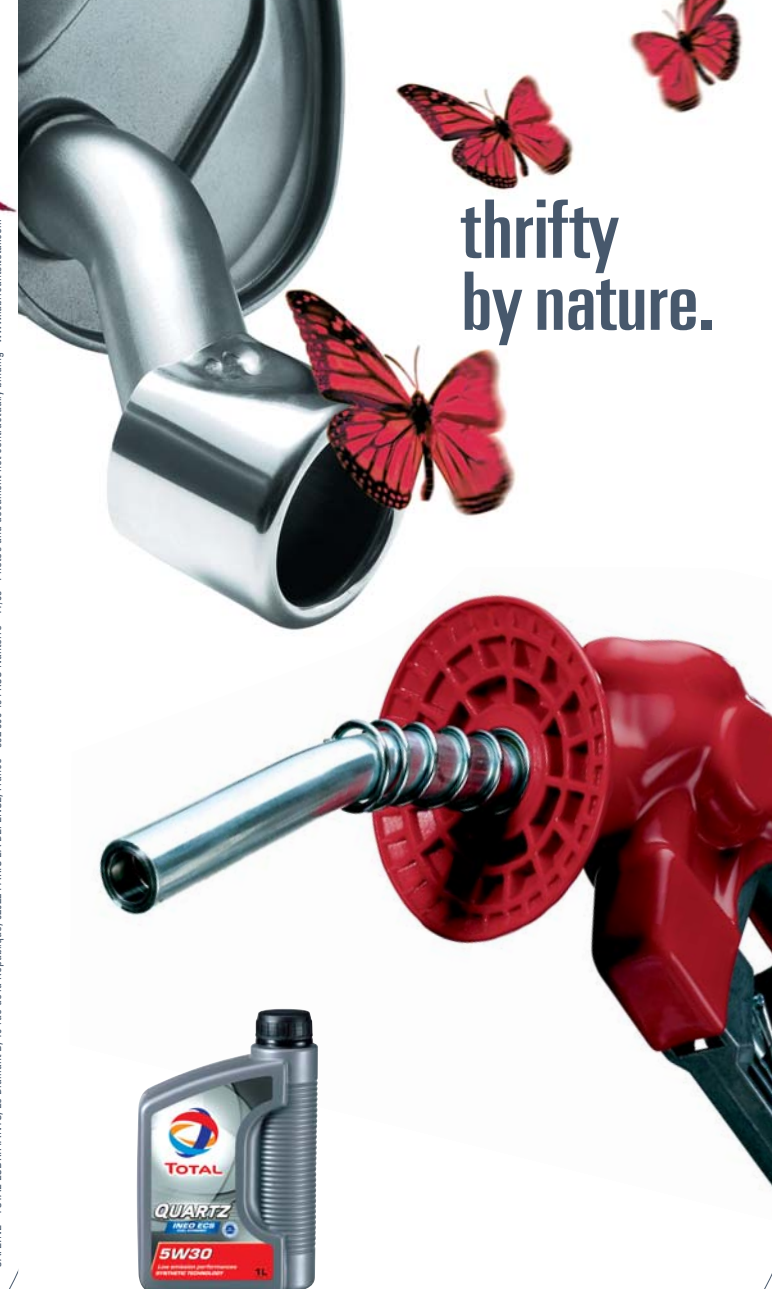

lubricant top-ups

QUARTZ INEO ECS is a lubricant designed to follow the Peugeot and Citroën service schedules, even the harshest.

However using oil is normal, and so it is essential to keep an eye on the level and top up between 2 engine oil changes, if necessary.

The top-up should be with the same oil in order not to downgrade its **↗ performances**

thrifty by nature.

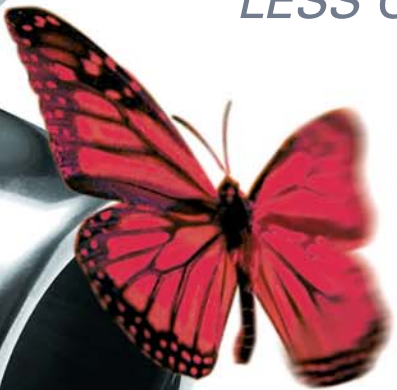

TOTAL QUARTZ INEO ECS

You know where to turn **TOTAL**

You know where to turn **TOTAL**

**1 TONNE
LESS OF CO₂***

QUARTZ INEO ECS enables the engine to reduce its polluting gas emissions by 50%. It protects the diesel particulate filter against premature clogging, a guarantee of its sustained efficiency! The reduction in fuel consumption also results in a reduction in CO₂ emissions.

**TOTAL QUARTZ
INEO ECS**

**Never was there a lubricant
that cared more for the
environment.**

**1 FILL SAVED
EACH YEAR****

QUARTZ INEO ECS is a certified Fuel Economy oil: it reduces engine internal friction and thus gives a visible reduction in fuel consumption.

* Reduction of 4 g of CO₂ emissions per km, corresponding to a reduction of 1 tonne of CO₂ emissions over the vehicle's lifetime for a diesel passenger car whose average lifetime is estimated to be 250,000 km.
** 30L. Result obtained using QUARTZ INEO ECS instead of traditional 15W-40 oil, for a passenger car PEUGEOT 307 or CITROEN C4 (1,6 Hdi) with a consumption of 4,8L/100 km, covering 18000 km annually.
